

Secure Customer-Owned Cloud Storage

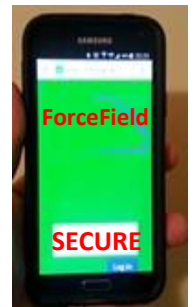

Secure Cloud Storage as a Service (SSaaS)

Customer Owned and Controlled Secure Storage in the Cloud

- Control who has access to your data
- Cost-effective, eliminate expensive Cloud download costs
- Access data from AWS, Azure, Google apps
- Access data from any device (Smartphones, Laptops, Servers, IoT)
- Scalable enterprise from small to unlimited Cloud storage
- Mirrored remote images mitigate DR risks
- Online, Offline, Nearline, Long-term Archives
- Trusted hardware-level hack-proof security

Intuitive Simple User Interface

- **Drop box, drag and drop to/from Cloud**
- **Browser access with secure HTTPS**
- **Drive letter or mount point on user desktop**
- **Network sharable like any storage device**
- **Standard file systems, standard applications**
- **Plug and Play devices combined with Cloud**
- **Scales from small to very large enterprise**
- **Multiple levels of redundancy and High Availability**
- **Automatic protection levels, automatic backup**
- **Customizable private, group and shared access**
